PROFESSIONAL SUMMARY

Detail-oriented Quality Assurance Analyst with 8 months of hands-on experience in manual testing for web and mobile applications. Adept at navigating the Software Testing Life Cycle (STLC) to detect bugs, enhance user experience, and ensure the delivery of high-quality, reliable products. Proven ability to write effective test cases, execute functional and regression tests, and collaborate seamlessly with cross-functional development teams.

TECHNICAL SKILLS

Methodologies : Manual Testing, Functional Testing, UI/UX Testing, Regression Testing, SDLC, STLC
Tools & Tracking : JIRA (Bug Tracking), Postman (Basic API Testing), Chrome DevTools, Git
Languages : Python, SQL, JavaScript, HTML, CSS

EXPERIENCE

Quality Assurance Analyst

Ahmedabad, India

Ninez Tech

Duration: 8 Months

- Executed comprehensive manual testing of complex web and mobile applications, ensuring strict adherence to project requirements.
- Authored and executed 150+ robust test cases covering diverse functional, UI, and regression testing scenarios.
- Identified, documented, and reported critical defects using JIRA, attaching detailed reproduction steps and precise screenshots.
- Collaborated directly with software developers to troubleshoot bugs, monitor issue resolution, and verify final fixes.
- Suggested and advocated for UI/UX improvements that enhanced application intuitiveness and overall user satisfaction.
- **Key Achievement:** Reduced post-release critical defects by an estimated 25% by implementing a more structured regression testing approach.
- **Key Achievement:** Maintained a 95% bug-detection rate prior to production releases, significantly minimizing technical debt and improving product quality.

EDUCATION

LJ University

Ahmedabad, India

PROJECTS

Campus Resource Management System (SaaS)

- Conducted functional and UI testing for a web-based booking platform to ensure seamless workflow automation and database integration.
